Vega+ Implants in the Esthetic Zone: Protocols, Indications, and Soft Tissue-Driven Outcomes

David García Baeza

klockner
MEDICAL Group

- Mehr ästhetische Sicherheit im Frontzahnbereich durch präzise 3D-Implantatpositionierung und strukturiertes Weichgewebemanagement
- Praxisnahe Fallbeispiele mit Vega+ Implantaten, die zeigen, wie Gewebestabilität und natürliche Ästhetik langfristig erreicht werden
- Konkrete klinische Leitlinien zur optimalen Abstimmung von Chirurgie, Prothetik und Provisorien für vorhersagbare Ergebnisse

Unser Portfolio bekommt Zuwachs.
Ein neues Kapitel der Implantologie.

klockner®

INTUITIV. BENUTZERFREUNDLICH. REVOLUTIONÄR.

The **esthetic zone** remains one of the greatest clinical challenges in implant dentistry. Achieving predictable and long-lasting esthetic results requires not only a prosthetically driven approach, but also meticulous soft tissue management and precise three-dimensional implant positioning.

This lecture focuses on the **Vega Plus implant system by Klockner**, reviewing its clinical indications, biological rationale, and surgical-prosthetic protocol in esthetically demanding situations. Through a series of clinical cases, the presentation will illustrate how implant macro- and micro-design, combined with correct 3D placement, contributes to tissue stability and esthetic integration.

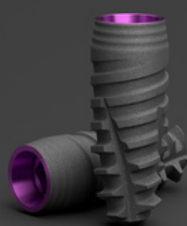

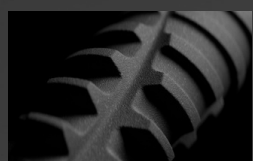

Special emphasis will be placed on **soft tissue management strategies** and the critical role of provisional restorations in shaping peri-implant tissues. The interaction between implant positioning, provisionalization, and emergence profile design will be analyzed as a key factor in achieving harmonious esthetic outcomes around both teeth and implants.

By integrating surgical precision with prosthetic and biological principles, this lecture aims to **provide practical guidelines to optimize esthetic predictability** when using Vega Plus implants in the anterior region.

DAVID GARCÍA BAEZA

Exclusive practice in implant dentistry and esthetic dentistry at CIMA Dental Clinic in Madrid.

Author of national and international articles on dental esthetics. International lecturer in the same disciplines and collaborator in university postgraduate programs in implant dentistry and esthetic prosthodontics.
